

DATREX 2220RT Type III USCG DX2220UOJ

DX2220UOJ

TYPE

Type III USCG Approved Near Shore PFD / Lifejacket

USES

Datrex 2220UOJ general purpose USCG approved Type III PFD is an inherent buoyant lifejacket with minimum buoyancy of 15.5 lbs. (7 kg) for adults and children in rough general purpose conditions. It is designed to turn an unconscious person from face down in the water to a vertical or slightly backward position. It provides many years of trouble free service made with weather and fade resistant fabric and nonabsorbent polyethylene foam that will not lose buoyancy if cut or punctured. Sewn on retro-reflective tape.

FEATURES

Good for protected, inland water near shore, where chances of immediate rescue is good. Not suitable for extended survival in rough water. Will turn SOME unconscious wearers face-up in water.

SPECIFICATIONS
