

DATREX TRIDENT 275N SOLAS/MED

DX275SHBJ

DX275SHBJ

TYPE

275N SOLAS/MED Dual Chamber Inflatable Lifejacket/PFD

USES

DATREX Trident 275N SOLAS/MED  dual chamber lifejacket is a high buoyancy commercial grade SOLAS approved inflatable PFD mostly used on mega yachts and commercial marine applications. Designed for offshore use, this jacket is made to be worn comfortably as part of your attire while working out at sea. The DATREX 275N allows for full mobility over clothing and has a reduced profile. DATREX Trident 275N fits comfortably over layers of clothing with double crotch straps. The exterior is made from a rugged dark cover that hides stains and dirt while the reflective and high visibility trim keeps you visible during day and night. The neoprene neckline adds comfort and reduces skin chafing. Dual chamber is for added safety at sea with one fully Hammar automatic hydrostatic inflator and a backup manual inflator. Hammar inflator is superior to other mechanism as it will not inflate accidentally due to moisture intrusion. It only inflates when water pressure is sensed . In addition to two Hammar inflators, both chambers are equipped with oral inflation tubes. Datrex Trident 275 includes a water activated lifejacket light, a whistle, buddy line, retroreflective tape and a hi-vis lifting loop for added safety while in water.

- Optional equipment that can be added to this product are MOB devices and sprayhood.
- Hammar inflators have 60 month worry free shelf life.

SPECIFICATIONS

ITEM NO.	DX275SHBJ
USE	Offshore / international waters
TYPE	Inflatable dual chamber offshore SOLAS jacket
Buoyancy	275N
Inflation System	Hammar Hydrostatic with 2 x 60g CO ² cylinders
CONTENT	1 SOLAS PFD, 1 SOLAS light, 1 reusable carry bag
PACKAGE WEIGHT	4 lbs (1.81 kg)
PACKAGE DIMENSIONS	11 x 23 x 2.5 inches (28 x 58.5 x 6.4 cm)
INSPECTION/WARRANTY	Annually/One Year Warranty
BARCODE NO.	00816664020175

APPROVAL/COMPLIANCE

IMO SOLAS MED approvals, RINA 0474-18
