

DATREX TRIDENT 275N SOLAS DX275SUBJ MED SOLAS 275N

DX275SUBJ

TYPE

275N MED SOLAS Dual Chamber Inflatable Lifejacket/PFD

USES

DATREX Trident 275N SOLAS MED dual chamber lifejacket is a high buoyancy commercial grade SOLAS approved inflatable lifejacket mostly used on mega yachts and ships. Designed for offshore use, this jacket is made to be worn comfortably as part of your attire while working out at sea. The DATREX 275N

allows for full mobility over clothing and has reduced profile. DATREX Trident 275N fits comfortably over layers of clothing with double crotch straps. The exterior is made from a rugged dark cover that hides stains and dirt while the reflective and high visibility trim keeps you visible during day and night.

Dual chamber is for added safety at sea with one fully automatic inflator and a backup manual inflator. Once automatically inflated, both inflation chambers are equipped with 2 oral inflation tubes, a SOLAS whistle, a hi-vis red lifting loop and SOLAS grade reflective tape for increased visibility while in water.

Datrex Trident 275N includes a water activated SOLAS LED light, attachment points for MOB devices and sprayhood.

SPECIFICATIONS

ITEM NO.	DX275SUBJ
USE	Offshore / international waters
TYPE	Inflatable dual chamber offshore SOLAS jacket
Buoyancy	275N
Inflation System	Halkey Roberts with 2 x 60g CO ² cylinders
CONTENT	1 SOLAS PFD, 1 SOLAS light, 1 reusable carry bag
PACKAGE WEIGHT	4 lbs (1.81 kg)
