- Neoprene hood**

D. L. no. 95 of 04/04/2005 is a safety regulation laying down technical standards for ships intended solely for touristic charters, establishing that each unit have to be equipped with:

- An immersion suit for each person on board;
- That is to say, in particular situations, an immersion suit for each component of the lifeboat (see Annex I of L.D. 95; Chapter 9, paragraph 2.5.1). Immersion suits shall be used during the abandonment in case of emergency.

Immersion suits shall be SOLAS approved and in accordance with binding MED Directive (see references ITEM MED and 1.6). Immersion suits on board can be an ISOLATED type (made in neoprene) or a NOT ISOLATED type (light polyamide); both types are equivalent for the legislation in force and they depends exclusively by the type of sailing which is undertaken.
